Click here to download the latest version of the driver directly from the Seagull Scientific website.. 4/8/2013 2:12 PM (in response to Angela) Thanks Angela, it's definitely a SURT1000 that did not come with an NMC.

Apc Usb Parallel Printer Cable Driver For Mac Os X4/8/2013 1:06 PM (in response to Stefan) You can try a USB to serial adapter.. I have only tried it for configuration cables for logging in and managing it so I imagine it would work properly for native OS support.. I am not sure of Mac compatibility though - I personally use this one: - I believe some APC units use this-> but the last person I spoke to had trouble installing the required drivers on Mac OS X.. (see this thread:) But - I have a question - can you verify that this is a SURT1000 and not SURT10000? Just wanted to double check as SURT10000 comes with a network management card and then you wouldn't want to use the DB-9 at the same time necessarily.. 18 10 0 If the driver is already installed on your system, updating (overwrite-installing) may fix various issues, add new functions, or just upgrade to the available version.

parallel printer cable driver
